Professional Summary

I am a passionate and versatile software developer with strong expertise in **JavaScript frameworks and Java**. Skilled in both backend and frontend development, I excel at building scalable, user-friendly applications and delivering seamless digital solutions. My experience ranges from developing **B2B e-commerce platforms** to implementing **ERP modules**, always applying **Agile methodologies** to ensure efficiency, quality, and collaboration. With a constant drive to learn and adapt, I thrive in dynamic environments where innovation and teamwork are key to success.

• Work Experience

Lutech – Functional Consultant

March 2025 – Present

Akeron – Frontend Developer

May 2022 – March 2025

- Built and maintained **frontend applications** using **Vue.js**, mainly focused on **B2B e-commerce solutions**.
- Contributed to **ERP systems** by implementing **Angular + Java/Spring Boot CRUD operations**, improving efficiency and maintainability.
- Collaborated with cross-functional teams to deliver responsive, scalable, and high-quality applications.

Impact Education / Udemy – Internship

September 2021 – November 2021

- Completed a structured internship focused on **modern web development** practices.
- Gained hands-on experience with frontend technologies, working on projects to apply new skills in real scenarios.

Skills

Frontend: Angular, Vue.js, Nuxt.js, React.js, Next.js, JavaScript, HTML, CSS, Tailwind CSS, Bootstrap, SASS, Styled Components.

Backend: Java, Spring Boot.

Other: Git, Agile methodologies, REST APIs.

Job-Related Achievements

- Designed and implemented **full CRUD operations** in Angular & Java/Spring Boot for a core ERP module.
 - Developed and deployed **responsive B2B websites and web apps** using Vue.js, HTML, CSS, and JavaScript.
-
